

JWST Opportunities and Policies

Articles in this section, “JWST Opportunities and Policies,” comprise the traditional call for proposals. These articles include information on observing and science policies, and details on the proposal submission process (including checklists). Other sections, that are selectable from the menu, provide information on [JWST Observatory and Instrumentation](#), [JWST Observation Planning](#), and [JWST Data Calibration and Analysis](#).

[Downloadable PDF](#) collections of this and other sections are provided as a courtesy, made available and updated when feasible. *The online documentation is the authority*, and will be updated with the latest information.
