

The Scientific Justification and Technical Description/Analysis Plan sections constitute the bulk of the proposal. Most proposals are limited to 4 pages for these sections; medium and combined GO+AR proposals are allocated 5 pages; Large, Treasury and AR Legacy proposals are allocated 6 pages. One additional page is available in all the above cases for the following sections: Special Requirements, Justify Coordinated Parallel Observations, Justify Duplications and Justify Coordinated Observations with Other Facilities. **Proposals that exceed these page limits risk disqualification. All text must be in 12-point font, including figure captions and references. Proposals that use different font sizes will be disqualified.** Proposers are recommended to devote at least one page to the Technical Description (for GO programs) or Analysis Plan (for AR programs). If you are writing a GO program, delete the Analysis Plan heading. If you are writing an AR program, delete the Technical Justification heading. The Observing Description in APT will not be visible for TAC reviewers. Proposers should not use that free text field as a replacement for page limit space. (This text can be deleted).

■ **Scientific Justification (required for all)**

■ **Technical Justification (required for GO, DD and Survey only)**

■ **Analysis Plan (required for AR only)**

One additional page is available for any of the following sections that are relevant. Proposers may delete headings for unnecessary sections. (This text can be deleted).

■ **Special Requirements (if any)**

■ **Justify Coordinated Parallel Observations (if any, GO/DD only)**

■ **Justify Duplications (if any, GO/DD only)**

■ **Justify Coordinated Observations with Other Facilities (if any, GO/DD only)**

This section is required for all Joint Observatory proposals. (This text can be deleted).

References can be listed at the end of the proposal and do not count towards page limits.
